BCP REACTO how to

Week 1: Day 4

April 2021

Some tips

- Practice verbally communicating your thought
- Outline a general approach for solving first
  - E.g. probably need to use a loop to …
- When talking about code
  - Always start with line number!

Pair programming

- **Decide who will be driver / navigator first**
- **Navigator will verbalize what to do**
- **Driver will do typing and share their screen**
- **Change roles every 15 minutes**

Pair programming

- **Navigator**
  - **Tells Driver what to code**
  - **Explain logic to Driver**
  - **Can ask Driver's opinion**

Pair programming

- Driver
  - Types code based on what Navigator tells
  - Always wait for Navigator to contribute idea first
  - Never write code without checking with Navigator
  - Always explain code to Navigator
